

EEP 596 Quiz 6 – Week 7, Mar 8 (Wed.) Spring 2024

1. What sensors are included in an Inertial Measurement Unit (IMU), and what measurements does each sensor record?
2. What are the key steps involved in converting gesture data collected through an IMU into an image? Briefly explain the advantages of each step.
3. Discuss why it is preferable to convert most of our data into images when possible.
